SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Product form: Mixture
Product name: Cafco FENDOLITE®-TG
Type of product: Dry powder
Product group: Fire protective spray.

1.2. Relevant identified uses of the substance or mixture and uses advised against
1.2.1. Relevant identified uses
Main use category: Professional use
Use of the substance/mixture: Fire protection on structures and vessels in the oil, gas, petrochemical industry, in tunnels and in the construction industry.

1.2.2. Uses advised against
No additional information available

1.3. Details of the supplier of the safety data sheet

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP]

- Skin corrosion/irritation, Category 2: H315
- Serious eye damage/eye irritation, Category 1: H318
- Skin sensitisation, Category 1: H317
- Specific target organ toxicity — Single exposure, Category 3: H335
- Respiratory tract irritation

Full text of H statements: see section 16

Adverse physicochemical, human health and environmental effects

Causes serious eye damage. Causes skin irritation. May cause respiratory irritation. May cause an allergic skin reaction.

2.2. Label elements

Labelling according to Regulation (EC) No. 1272/2008 [CLP]

- Hazard pictograms (CLP):
  - GHS05
  - GHS07

- Signal word (CLP): Danger

- Hazardous ingredients: Portland cement

- Hazard statements (CLP):
  - H315 - Causes skin irritation.
  - H317 - May cause an allergic skin reaction.
  - H318 - Causes serious eye damage.
  - H335 - May cause respiratory irritation.

- Precautionary statements (CLP):
  - P261 - Avoid breathing dust, mist, spray.
  - P264 - Wash hands, forearms and face thoroughly after handling.
  - P280 - Wear protective clothing, protective gloves, eye protection, face protection.
  - P305+P351+P338+P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER.
  - P312 - Call a POISON CENTER if you feel unwell.
  - P333+P313 - If skin irritation or rash occurs: Get medical advice/attention.

Extra phrases:
- Skin contact with wet cement, fresh concrete or mortar may cause irritation, dermatitis or burns. May cause damage to products made of aluminium or other non-noble metals.
2.3. Other hazards

Other hazards not contributing to the classification:

- Depending upon the source of the Portland cement, the product could be contaminated with chromium VI. In several countries, the soluble chromium VI is legally limited to 0.0002% of the total dry weight. If soluble chromium VI is present in the Portland cement above the 0.0002%, a reduction agent has been added to it to keep the content of soluble chromium VI under the 0.0002%. The activity of this reduction agent is limited in time, what limits the shelf life of the product. The product should be used within 1 year after its production date. Natural contamination of some substances of the preparation with crystalline silica could occur. The inhalation of quartz containing dust, in particular the fine dust fraction (respirable size), in high concentrations or over repeated or prolonged periods of time can be hazardous to health and may lead to chronic lung disease and an increased risk of lung cancer. This risk will be minimal if correct working practices are observed and applied. (Refer to Section 8). According to the International Agency for Research on Cancer (IARC Monograph Volume 100C - 2012) “Crystalline silica inhaled in the form of quartz or cristobalite is carcinogenic to humans (Group 1).”

SECTION 4: First aid measures

4.1. Description of first aid measures

First-aid measures general:

- IF exposed or concerned: Get medical advice/attention.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor.

First-aid measures after inhalation:

- Remove person to fresh air and keep comfortable for breathing. Rinse throat with water and blow nose to evacuate dust. If nose or airways become inflamed, seek medical advice.

First-aid measures after skin contact:

- Remove all dust as much as possible. Take off contaminated clothing. Rinse the skin immediately with plenty of water and soap. If skin irritation or rash occurs: Get medical advice/attention. In case of allergy, seek medical advise.

First-aid measures after eye contact:

- Remove person to fresh air and keep comfortable for breathing. Rinse throat with water and blow nose to evacuate dust. If nose or airways become inflamed, seek medical advice.

First-aid measures after ingestion:

- Rinse mouth out with water. Do not induce vomiting without medical advice.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms/effects after inhalation:

- May cause irritation to the respiratory tract and to other mucous membranes.
Symptoms/effects after skin contact: The Portland cement components may lead to transient irritation of skin, eyes or respiratory system. When moistened by water or sweat, the Portland cement component may lead to skin inflammation, contact dermatitis or even delayed onset burns due to high alkalinity. May cause an allergic skin reaction.

Symptoms/effects after eye contact: Risk of serious damage to eyes.

Symptoms/effects after ingestion: Not expected to present a significant ingestion hazard under anticipated conditions of normal use.

4.3. Indication of any immediate medical attention and special treatment needed
Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media
Suitable extinguishing media: All extinguishing media can be used.

5.2. Special hazards arising from the substance or mixture
Reactivity in case of fire: Product is not explosive. The product is non-combustible.
Hazardous decomposition products in case of fire: Toxic fumes may be released. Carbon oxides (CO, CO2).

5.3. Advice for firefighters
Protection during firefighting: Do not attempt to take action without suitable protective equipment. Self-contained breathing apparatus. Complete protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1. For non-emergency personnel
Protective equipment: Wear recommended personal protective equipment.
Emergency procedures: Do not breathe dust. Avoid contact with skin and eyes. Dampen down any dust or use vacuum cleaner with correct filter.
Measures in case of dust release: Prevent spread of dust.

6.1.2. For emergency responders
No additional information available

6.2. Environmental precautions
Do not allow entry to drains, sewers, water courses or soil. Dampen down any dust before putting into skips or use vacuum cleaner with correct filter.

6.3. Methods and material for containment and cleaning up
For containment: Use closed containers to avoid dust release.
Methods for cleaning up: Dampen down any dust or use vacuum cleaner with correct filter. Minimise generation of dust.
Other information: Dispose of materials or solid residues at an authorized site.

6.4. Reference to other sections
See sections 7, 8 and 11.

SECTION 7: Handling and storage

7.1. Precautions for safe handling
Precautions for safe handling: Use only outdoors or in a well-ventilated area. Use always respiratory protective equipment when exposures are likely or can be foreseen to exceed the Occupational Exposure Limits or Workplace Exposure Limits in the UK (refer to local regulations). Avoid all unnecessary exposure. Avoid contact with skin and eyes. Ensure prompt removal from eyes, skin and clothing.
Handling temperature: 4 - 45 °C
Hygiene measures: Use good housekeeping practices to avoid rendering dust airborne. Do not eat, drink or smoke when using this product. Always wash hands after handling the product. Take off contaminated clothing and wash it before reuse. Contaminated work clothing should not be allowed out of the workplace.

7.2. Conditions for safe storage, including any incompatibilities
Storage conditions: Store locked up. Protect from moisture. Keep bags closed when not in use. Keep away from food, drink and animal feeding stuffs. Store in dry, covered and frost proof area.
Incompatible materials: Avoid contact with aluminium.
Maximum storage period: 12 months The packaging is marked with the packing date, the storage conditions and the storage period appropriate to maintain the activity of the reducing agent and to keep the content of soluble chromium VI below the limit indicated in section 2.

7.3. Specific end use(s)
Fire protection.
## SECTION 8: Exposure controls/personal protection

**Occupational Exposure Limits / Workplace Exposure Limits for particles not otherwise classified or regulated (nuisance dust):**

- in UK: Inhalable: 10 mg/m³. Respirable: 4 mg/m³
- in Ireland: Inhalable: 10 mg/m³. Respirable: 4 mg/m³

Additional information:

Exposure limit values have been established by many authorities. Check on limit values that apply in your local situation. Ensure all national/local regulations are observed.

**8.2. Exposure controls**

**Appropriate engineering controls:**

Provide adequate ventilation to minimize dust concentrations. Ensure exposure is below occupational exposure limits (where available).

**Hand protection:**

Use alkali resistant gloves.

**Eye protection:**

Safety glasses with side shields. Use splash goggles when eye contact due to splashing is possible. Foresee eye cleaning on the workplace.

**Skin and body protection:**

Use loose work clothes with closed sleeves. Preventive skin protection creams can be used, but not after skin contact with the product.

**Respiratory protection:**

Use appropriate respiratory equipment when exposures are likely or can be foreseen to exceed the Occupational Exposure Limits or Workplace Exposure Limits for the UK (e.g. for exposures up to 10 times the OEL (WEL) use at least a P2 type dust mask. For higher exposure, use a P3 type mask). Respiratory equipment required during spraying.

**Environmental exposure controls:**

Avoid release to the environment. Do not allow to enter drains or water courses.

29/01/2019 (Version: 2.0)
Cafco FENDOLITE®-TG
Safety Data Sheet
according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2015/830

Explosive properties: No data available
Oxidising properties: No data available
Explosive limits: Not applicable

9.2. Other information
No additional information available

SECTION 10: Stability and reactivity

10.1. Reactivity
The product is non-reactive under normal conditions of use, storage and transport.

10.2. Chemical stability
Stable under normal conditions. Shelf life is maximum 12 months.

10.3. Possibility of hazardous reactions
No dangerous reactions known under normal conditions of use.

10.4. Conditions to avoid
Humidity during storage.

10.5. Incompatible materials
Strong acids.

10.6. Hazardous decomposition products
Under normal conditions of storage and use, hazardous decomposition products should not be produced. Alkaline mixture.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity (oral): Not classified
Acute toxicity (dermal): Not classified
Acute toxicity (inhalation): Not classified

Portland cement (65997-15-1)
LD50 oral > 2000 mg/kg mouse
LD50 dermal rabbit > 2000 mg/kg LD0 : 2000 mg/kg
Skin corrosion/irritation: Cement powder or a mixture of cement with water can cause irritant contact dermatitis, and/or delayed onset of skin burns. These burns can be very serious in prolonged contact with skin.
Serious eye damage/irritation: Causes serious eye damage.
Respiratory or skin sensitisation: May cause sensitisation of susceptible persons by skin contact
Germ cell mutagenicity: Not classified
Carcinogenicity: Not classified
Reproductive toxicity: Not classified
STOT-single exposure: May cause respiratory irritation.
STOT-repeated exposure: Not classified
Aspiration hazard: Not classified
Potential adverse human health effects and symptoms: Inhaling cement dust may aggravate existing respiratory system disease(s) and/or medical conditions such as emphysema or asthma and/or existing skin and/or eye conditions.

SECTION 12: Ecological information

12.1. Toxicity
Ecology - general: The product is not considered harmful to aquatic organisms nor to cause long-term adverse effects in the environment.
Acute aquatic toxicity: Not classified
Chronic aquatic toxicity: Not classified

12.2. Persistence and degradability
Cafco FENDOLITE®-TG
Persistence and degradability: Not readily biodegradable.

12.3. Bioaccumulative potential
Cafco FENDOLITE®-TG
Bioaccumulative potential: Not expected to bioaccumulate.

12.4. Mobility in soil
No additional information available

12.5. Results of PBT and vPvB assessment
No additional information available
12.6. Other adverse effects

Additional information: Accidental spillage of cement powder in waste water, results in a low increase in the pH. Hydrated cement is a stable material that definitely sets its compounds and makes them insoluble. Do not allow entry to drains, sewers, water courses or soil.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Waste treatment methods: To avoid classification as hazardous waste, the product can be cured with water. After curing the product can be handled as non-hazardous waste.

Product/Packaging disposal recommendations: Dispose in a safe manner in accordance with local/national regulations.

European List of Waste (LoW) code: 10 13 14 - waste concrete and concrete sludge 17 01 01 - concrete

Please refer to the European list (Decision N° 2014/955/CE as modified) to identify the wastes appropriate waste number.

SECTION 14: Transport information

Overland transport: Not regulated

Transport by sea: Not regulated

Air transport: Not regulated

Inland waterway transport: Not regulated

Rail transport: Not regulated

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

Not applicable

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

15.1.1. EU-Regulations

The following restrictions are applicable according to Annex XVII of the REACH Regulation (EC) No 1907/2006:

47. Chromium VI compounds: Cafco FENDOLITE®-TG

Contains no substance on the REACH candidate list
Contains no REACH Annex XIV substances
15.1.2. National regulations
No additional information available

15.2. Chemical safety assessment
No chemical safety assessment has been carried out

SECTION 16: Other information

Indication of changes:
This sheet has been revised completely (changes were not marked).

Safety Data Sheet applicable for regions:

: CY;GB;GI;IE;IS;MT

SDS EU (REACH Annex II) custom
The Safety Information given in this document was obtained from sources which we believe are reliable. However, the information is provided without any warranty, express or implied, regarding its correctness. The conditions or methods of handling, storage, use or disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product. This Safety Information was prepared and is to be used only for this product. If the product is used as a component in another product, this Safety Information may not be applicable.

This data sheet and the information it contains is not intended to supersede any terms or conditions of sale and does not constitute a specification. Nothing contained herein is to be construed as a recommendation for use in violation of any patent or applicable laws or regulations.
